

J-BIRD III CAMPAIGN

THE WORLD'S FIRST TP52 GOES ELECTRIC

THE SHIFT TO ELECTRIC POWER FROM RENEWABLE RESOURCES IS HAPPENING NOW AND IT IS HAPPENING VERY, VERY FAST.

THE CAMPAIGN

- June 2021 – The Launch
- July 2021 – Brisbane to Hamilton Island Yacht Race
- August 2021 – Airlie Beach Race Week
Hamilton Island Race Week
Magnetic Island Race Week
- December 2021 – Rolex Sydney to Hobart Yacht Race
- March 2022 – Brisbane to Gladstone Yacht Race
- May/June 2022 – Around Australia World Record Attempt

Our 2021/22 program is quite intensive as we campaign towards our two biggest goals, the 2021 Rolex Sydney to Hobart & the 2022 Around Australia Fully Crewed World Record Attempt.

The Sydney to Hobart is the pinnacle of offshore racing in Australia & racing at the front, our goal is to push our message to the masses whilst pushing for handicap honours. See the Rolex Sydney to Hobart featured on Spirit of Yachting here: <https://youtu.be/Or9P5FkzgoI>

The final chapter of this campaign is the Around Australia Fully Crewed World Record. The current monohull record was set in July 2003 by the Sailors with Disabilities campaign in a time of 37d 1h 23m 57s. A team of 9 sailors will set sail in May/June 2022 in an attempt to lower this mark to approximately 28 days.

Founder Ian Thomson owns the solo record when he launched Ocean Crusaders in 2010, smashing the existing record by 26 days in the process.

THE BOAT

Follow the rebuild at:
<http://www.Facebook.com/jbirdIII>

J-Bird III is the first TP52 (Trans-Pacific) yacht to ever hit the water. This popular class has proven the boat to have if you want to win races on handicap having claimed three of the last 5 Sydney to Hobart Yacht Races and countless other regattas across Australia.

We found J-Bird III rotting on a mooring in Pittwater. Whilst others wanted to scrap her, we decided to rebuild her. We are in the process of replacing the deck with a new core made from Recycled PET bottles and Bio-Resins. We have also removed the old diesel engine and are replacing with a new Bellmarine electric drive and lithium batteries, hence creating a ZERO EMISSIONS elite racing machine, the first of it's kind in Australia.

The yacht can reach speeds in excess of 20 knots and has hit a top speed of 28.2 knots with former owners. Light, fast and exhilarating to sail, this will be the only yacht of it's type available for a corporate experience in Brisbane, whilst also being made available for the race regattas in Queensland and Geelong.

J-Bird III on her way to winning the Trans-Pacific Yacht Race in 2001

The old deck makes way for the new deck

ABOUT US

Ocean Crusaders was founded on a passion having seen first hand our marine life die due to human habits such as plastic.

Founded by Ian Thomson when he sailed solo around Australia in 2010, the charity is now a leading environmental movement with a focus to clean our oceans removing on average 1 tonne a day when out cleaning with our custom built vessels. We're not your average clean up crew.

This extension of the charity is designed to bring focus to a no emissions future for yachting here in Australia.

Our crew is highly experienced in offshore sailing and will be led by Stacey Jackson, a world renowned Volvo Ocean Race competitor and Wendy Tuck who lead a group of amateur sailors to a win in one of the toughest around the world one design challenges today.

Whilst not a focus of our campaign, we will be leading by example when it comes to sailing equality. We don't believe in having women or men on a boat, we will simply have the best 'sailor' for each position on the boat.

Ian Thomson – Founder Ocean Crusaders

Ian launched the charity off the back of his solo around Australia monohull record in 2010 taking 26 days off the previous record. He has sailed in 3 Sydney to Hobart campaigns with a division win & podium to his name.

Annika Thomson – Co-Founder

Grew up sailing in Sweden and founded Ocean Crusaders Sverige in 2018. A professional skipper by trade, she has a Sydney to Hobart podium to her name and has sailed over 30,000nm around the world.

Stacey Jackson – Ambassador

Having raced in 2 Volvo Ocean Race Campaigns, Stacey was the instigator behind the all professional Women's Crew known as Ocean Respect Racing that placed 2nd in the 2018 Sydney to Hobart.

Wendy Tuck – Ambassador

The only woman to have skippered a winning around the world yacht race when she guided Sanya to the win in the Clipper Round the World Yacht Race in 2018. Has 13 Sydney to Hobarts to her name and several class victories and hasn't been off the podium in her last 6 races.

THE MESSAGE

Possible Campaign Message

Zero Emissions doesn't mean you have to compromise. In fact Zero Emissions means you aren't compromising the environment.

Clean energy solutions are growing at a rapid rate around the world.

We want to prove that you can run an elite racing campaign with zero emissions without sacrificing performance. In fact, we want to prove how it can be an advantage.

We're lowering the weight of the yacht and the centre of gravity by removing an old 260kg diesel and replacing with an electric drive and batteries slightly lighter than what we removed. And it is all situated lower in the boat creating better stability.

It's unquestionable that it's time to reduce carbon emissions from our lives and your brand can send a message to Australian's that you are going to lead the way.

(Of course our message can be adapted to best suit your brand.)

The Ocean Crusaders Message

A clean ocean makes us All WINNERS!!!

Ocean Crusaders are out to make a difference to the lives of our marine & birdlife by physically removing tonnes of debris from rivers, estuaries and mangroves.

Many organisations educate through talking, we educate through actions, by showing them boat load after boat load of debris coming out of local waterways. The sheer volume is meant to shock people and we also invite them to join us on the boat and see it themselves.

THE OFFER

We aim to succeed, thus we need to be associated with a company who shares a common passion and motivations. If your company values are Sustainability, Performance, Team Spirit and Outstanding Achievements, then we are made to be partners.

We are offering our vessel as a marketing tool for your brand. In order to finalise any offer, we need to know what will work for you and your clients. Some ideas would include:

- **Team Building Days** –Bring your team aboard for either an organised social race or a corporate training day.
- **Client ‘Zero emissions’ experience** –Treat your clients to a day on the race boat during an organised race (twilight or afternoon)
- **Race Week Experience** –A unique opportunity for you or your clients to experience a full race week in Queensland’s tropics, becoming part of the crew and racing at the elite level. Up to 10 spots available for each race week.
- **Sponsors chase boat at regattas and major races** –Have non-sailing crew get up close to the action aboard our sponsors chase boat
- **Exposure on one of the most high profile vessels in Australian Yachting** –Logos on sails, hull, media etc
- **Motivational speakers for any event** –Have one of our crew visit a conference and motivate your staff through listening to the challenges they have faced and how they have overcome them to achieve what they have.
- **Environmental Business consultation from Founder Ian Thomson** –Ian lives and breathes the Ocean Crusaders message. Have Ian visit your stores/head office and offer advice on how you can improve your environmental sustainability.

THE BUDGET
